PROFESSIONAL SUMMARY

Engineer Business System Analyst with 2.5+ years of experience delivering AI-enabled solutions within BFSI environments. Experienced in stakeholder management, product discovery, requirements gathering, user stories, acceptance criteria, Agile delivery, backlog refinement, sprint planning, and cross-functional collaboration. Hands-on experience building Generative AI, RAG, Agentic AI, predictive analytics, and automation solutions using Python, FastAPI, Streamlit, and LangChain. Skilled in product strategy, roadmapping, MVP definition, AI evaluation metrics, KPIs, and product prioritization.

SKILLS

Product Management: Product Strategy, Product Roadmap, Product Discovery, Product Prioritization, MVP Definition, PoC, Pilot Programs, PRDs, User Stories, Acceptance Criteria, Backlog Management

AI Product Management: Generative AI, Agentic AI, LLMs, Retrieval-Augmented Generation (RAG), AI Evaluation, AI Governance, Human-in-the-Loop Systems, AI Automation

Agile & Stakeholder Management: Agile, Scrum, Jira, Sprint Planning, Stakeholder Management, Cross-Functional Collaboration, Requirements Gathering, Business Analysis, KPI Definition

Technical: Python, SQL, FastAPI, Streamlit, LangChain, LangGraph, AWS, REST APIs, Vector Databases, Machine Learning, Predictive Analytics

PROFESSIONAL EXPERIENCE

UNISYS INDIA PRIVATE LIMITED

Jan 2024 – Present

Engineer Business System Analyst

AI-Powered Loan Risk Assessment Platform

- Collaborated with stakeholders and engineering teams to identify AI and automation opportunities across BFSI workflows serving enterprise clients across multiple US states.
- Gathered business requirements and translated them into user stories, acceptance criteria, and functional specifications.
- Participated in product discovery, MVP definition, backlog refinement, sprint planning, and Jira management.
- Defined KPIs and success metrics to evaluate AI initiatives and business impact.

AI-Powered Services Cost Calculator

- Led requirements gathering and solution definition for an AI-powered cost estimation platform serving enterprise clients across the United States.
- Collaborated with stakeholders to prioritize features, define MVP scope, and automate estimation workflows using Generative AI and LangChain.

PROJECTS

Credit Card Fraud Detection System

- Built and deployed a fraud detection platform using FastAPI, Streamlit, XGBoost, Scikit-Learn, and Python.
- Achieved 99% fraud prediction accuracy while defining business-focused AI evaluation metrics including Precision, Recall, and F1-Score.

Multimodal RAG Retail Assistant

- Developed a multimodal Agentic AI retail assistant using LangChain, vector databases, and LLMs to automate product information retrieval and suggest products based on user fashion preferences and computer vision.

EDUCATION

Bachelor of Mathematical Science

Delhi University

First Division, 86%

CERTIFICATIONS

- Microsoft AI Product Management Professional Certificate
- Advanced Business Analysis, BACentric IIBA Certified
- Data Analysis Certification
- Data Science to Agentic AI
