PROFESSIONAL SUMMARY

Business System Analyst with 2.7+ years of experience translating business problems into customer-centric enterprise products. Skilled in defining product requirements, User Stories, Acceptance Criteria, process flows, feature prioritization, and collaborating with cross-functional teams to deliver scalable digital solutions. **Proficient in SQL, UI/UX, APIs, and currently building AI-powered products for B2B and B2C.**

SKILLS

Product Management: Product Discovery, Product Strategy, Product Requirements (**PRDs**), User Story Mapping, Feature Prioritization (MoSCoW), **MVP** Planning, Product Roadmapping, Customer Journey Mapping, User Personas, **Product Analytics, KPI Definition, A/B Testing, Product Metrics, Go-to-Market Support**

Business Analysis: Requirement Elicitation, BRD, FRD, Functional Specifications, User Stories, Acceptance Criteria, Use Cases, Process Mapping, AS-IS / TO-BE Analysis**, Gap Analysis, RTM, UAT, Jira**, Root Cause Analysis

Data & Analytics: SQL, Excel, Dashboard Reporting, Data Visualization, Business Intelligence, **KPI Reporting, Data Analysis**

AI & Technical: REST APIs, FastAPI, Streamlit, LangChain, LLMs, Prompt Engineering, RAG, AI Agents, FAISS, Machine Learning, GitHub

PROFESSIONAL EXPERIENCE

UNISYS INDIA PRIVATE LIMITED Jan 2024 – Present

Engineer Business System Analyst

Enterprise Loan Management Platform

- Drove product discovery for an enterprise loan management platform by collaborating with Product Owners, SMEs and engineering teams, defining requirements that supported lending workflows across **10+ U.S. states**.
- Authored **100+** User Stories, BRDs, FRDs and Acceptance Criteria through stakeholder workshops and AS-IS/TO-BE analysis, accelerating sprint readiness by **30%**.
- Partnered with engineering, QA and business teams throughout Agile SDLC, supporting **4+ production releases**, executing SIT/UAT, and developing SQL-powered dashboards to monitor KPIs and improve release quality.

Enterprise Services Cost Calculator

- Collaborated with business stakeholders and Product Owners to define product requirements for an enterprise cost estimation platform supporting **200+ service offerings**, translating business needs into prioritized product features.
- Conducted workflow analysis, GAP analysis and feature prioritization using the **MoSCoW** framework, identifying **20+ process improvements** that streamlined pricing workflows and supported MVP planning.
- Partnered with engineering and QA teams across the Agile SDLC, supporting **3+ production releases**, executing UAT, and developing Power BI dashboards to monitor **15+ business KPIs** for pricing accuracy and operational performance.

PROJECTS

Multimodal RAG Retail Assistant

- Designed and developed an AI-powered retail assistant using **LLMs, LangChain, FAISS, FastAPI and Streamlit**, enabling semantic product search across a catalog of **44K+ products** using Retrieval-Augmented Generation (RAG).
- Defined the product vision, MVP, user personas, customer journeys and success metrics while designing conversational workflows, vector retrieval pipelines and scalable AI architecture to improve product discovery and recommendation quality.
- Built an end-to-end RAG pipeline integrating vector search, metadata filtering and LLM reasoning, reducing product search time from minutes to **under 5 seconds**.

Finance Shield AI – Credit Card Fraud Detection Platform

- Built an AI-powered fraud detection platform using **Python, FastAPI, Streamlit and XGBoost**, delivering real-time fraud prediction with an interactive dashboard for business users.
- Defined the product vision, target users, MVP and success metrics while performing exploratory data analysis, feature engineering and model evaluation using Precision, Recall, F1-Score and ROC-AUC.

EDUCATION

Bachelor of Mathematical Sciences University of Delhi

First Division (86%)

CERTIFICATIONS

- Microsoft AI Product Management Professional Certificate (Coursera)
- Data Analytics Certification
- IIBA Business Analysis Certification
